Django

Static files

Saurabh Shukla (MySirG)

Agenda

1. What are static files?
2. static directory
3. Directory structure
4. using static files in templates

What are static files?

In web application, you probably want to add some static files like images or css files.

static directory

Create a folder with name static in your project, the same place where you created the templates folder

The name of the folder must be static only.

Directory structure

firstproject
  manage.py
  firstproject
  testapp
    templates
    static
      mytheme.css

    views.py
    models.py
    urls.py
    admin.py

Create a css file in static directory and write some css in it.

```
{% load static %}

<link rel="stylesheet" href="{% static 'mytheme.css' %}">
```
